### Aatrox
the Darkin Blade

"Once honored defenders of Shurima against the Void, Aatrox and his brethren would eventually become an even greater threat to Runeterra, and were defeated only by cunning mortal sorcery. But after centuries of imprisonment, Aatrox was the first to find freedom once more, corrupting and transforming those foolish enough to try and wield the magical weapon that contained his essence. Now, with stolen flesh, he walks Runeterra in a brutal approximation of his previous form, seeking an apocalyptic and long overdue vengeance."

**League of Legends** is a multiplayer online battle arena. It's been one of the most popular games of all time and currently one of the biggest esports.

In a standard game of League, ten players are split into two teams of five and battle it out on a map called Summoner's Rift.

Each of these players controls a single character, known as a champion.

## What is a champion?

All ten players in a League of Legends match controls a single champion.

There are currently over 140 champions with new ones being continuously added over time.

Every champion has special abilities and powers with unique playstyles.

Before a game begins at champ select, each team takes turns selecting champions.

There's a lot of strategies involved as you work with your team to create teams with champions that work well together (more on this later).

Every game you play can be vastly different since every champion has their own feel and gameplan.

## How do you win?

The ultimate goal of LoL is to destroy the other team's base, but it's not easy.

Your enemies will do everything they can to kill you and destroy your base.

Each base has a series of turrets and waves of minions that constantly spawn.

If you started a game and tried to run straight to the enemy base, you'd certainly die, not just because the enemy team would be trying to stop you at all costs, but also because you may be too weak and die.

League is sort of like a role-playing game (RPG) that takes place in a very short amount of time.

You begin at level 1 and gradually get stronger throughout the game by gaining experience and earning gold to buy items.

The two teams continually grow in power and collide. Eventually, one team is able to get the upper hand and make a final push for a victory.

# Download Our Real Time Analytics App for best results!

This app is designed to **Predict** the outcome of the match based on you playstyle. the app seamlessly connects to the game's client api and shows useful information like **Kills Deaths and Assists.**

It integrates this API information along with MACHINE LEARNING to suggests specific lanes for which a champion should be played,along with the champion level and ability levels with around **80%accuracy.**

## How to use this App?

1. Download the App to your device
2. Open the App (Make Sure that you're inside a match in the game)
3. KaBOOM! follow the 'Ray of Light' (our App) 😁

## To Download the App, follow the given Steps:

1. Click on the button below. It'll redirect you to a google drive link!
2. It'll download an .exe file
3. No need to install it. It's ready to ROCK!

⬇ **DOWNLOAD**
